To,
The Hiring Team
NyaaMi AI
Bangalore, India (Remote Workflow)

Subject: Application for Full Stack Developer Internship

Dear Founder and Hiring Team,

I am writing to express my strong interest in the Full Stack Developer Internship at NyaaMi AI. As an aspiring full-stack engineer pursuing my BCA, I specialize in building end-to-end web applications and actively integrating GenAI into my development workflow to move fast and deliver robust solutions. Your focus on heavy AI-tool utilization, high autonomy, and direct founder collaboration perfectly matches my technical skill set and working style.

Currently, I am working as a MERN Full Stack Developer at Zaalima Development Pvt. Ltd., where I collaborate with engineering teams to build, optimize, and deploy scalable features from the UI to the backend. This role has sharpened my hands-on capabilities with JavaScript, React.js, Node.js, and MongoDB Atlas, allowing me to take full ownership of modules and write clean, high-performance code.

Furthermore, I possess a deep familiarity with Python and backend frameworks, having previously built standalone applications like a Geolocation Tracker and a Smart Web Scraper during my internship at HexSoftwares. Crucially, my background as a GenAI Prompt Engineer at Shuchita Prakashan (P) Ltd. uniquely positions me to meet your requirement of using AI tools to accelerate development timelines and solve unstructured engineering challenges independently.

I am comfortable working autonomously, enjoy taking ownership of entire modules from scratch, and pride myself on figuring things out while knowing exactly when to ask high-value questions. I have deployed live projects that reflect these capabilities, all of which are accessible on my GitHub and portfolio.

Thank you for your time and consideration. I am highly motivated to contribute to NyaaMi AI's fast-paced environment and am available to start immediately in this full-time, work-from-home capacity. I look forward to the possibility of discussing how my technical skills and AI developer workflow can add value to your team.

Sincerely,

Suraj Maurya
Full Stack Developer & GenAI Enthusiast
